

FLAT HEAD RANGE

THERMAL TRANSFER RIBBONS

- ▶ A whole range of colours has been developed on the basis of our current wax, wax/resin and pure resin qualities, to suit a number of automatic identification and graphic applications, with similar printing performance than their equivalent black ribbons. These products are ideally suited to all Thermal Transfer printers equipped with Flat Head printheads.

Produced under ISO 9001 standards, in one of the industry's most organised and independently acclaimed factories, ARMOR ribbons benefit from a strong Quality and Sustainable Development culture, ensuring that rolls are produced in ethical conditions with a minimum impact on the environment.
