8000D Linerless

Permanent Labels

Direct Thermal

8000D linerless is a direct thermal, white silicone paper label with permanent rubber adhesive . The absence of a liner allows for more labels per roll and no waste having both environmental and safety implications in some applications. The labels have good scratch and smear resistance and the print quality is excellent when used in a linerless printer*. This product is not to be used in applications involving chemicals.

*Requires a linerless roller.

Suggested Applications

- Mobile point of sale labelling
- Work in process labelling
- Applications that do not allow the use of a liner

Technical Specifications
