

Thermal Transfer Ribbons

Citizen Ribbons - Reliability you can trust

Reliability comes as standard with our printers and we also build it in to our thermal transfer ribbons designed specifically for Citizen barcode printers. We provide a range of common sizes and widths to suit your needs and three types of ribbon composition to give you the best performance from our ribbons.

When you buy a Citizen thermal ribbon you get:

- a ribbon that is designed for and extensively tested to specifically to work with your printer without any fuss or installation issues.
- a one-stop-shop: a complete solution from one supplier ensuring that both our Citizen resellers and Citizen's end customers get trouble-free supply and operation.
- peace of mind: reassurance that the ribbon will fit the printer and should work well in your application.

Ribbon Types: Standard, Blend & Resin

STANDARD - a wax-based ribbon for standard, high speed, high volume printing on to labels, tags and normal vellum media

BLEND - our wax/resin blended ribbon, (resin-enhanced wax), gives the best performance on a wide variety of materials from standard labels to PET.

RESIN - for the ultimate in performance on specialist materials such as polyester and other shiny surface products such as metalised foils for rating plates.

Ribbon Compatibility

Ribbon Width	Ribbon Length	Part Number	CLP 621 CLP 631 CLP 2001	CLP 4081 CLP 6001 CLP 6002	CLP 7201e CLP 7202e CLP 7401	CL-S700	CLP 9001 CLP 9301	CLP 8301
55 mm	300 metres	3x30055	✓	✓	✓	✓	✓	
80 mm	300 metres	3x30080	✓	✓	✓	✓	✓	
110 mm	300 metres	3x30110	✓	✓	✓	✓	✓	✓
110 mm	450 metres	3x45110				✓	✓	✓
150 mm	450 metres	3x45150						✓
220 mm	450 metres	3x45220						✓

The "x" in the part number is as follows: 3 for standard, 4 for blend, 5 for resin

There are many different types of materials that can be printed on by Citizen printers, ranging from paper labels to metalised plates and polyethylene tags. Citizen strongly recommends that, especially in critical applications, the ribbon selected is tested with the exact material to be used and that the scratch resistance and image quality is approved first. The following should be used as a guideline only.

Suggested Application	Standard	Blend	Resin
